# Ninth International Scientific Conference

## THE TEACHER OF THE FUTURE (first call)

**Dear Sir/Madam,**

It is our pleasure to inform you that in the period from **17<sup>th</sup> to 19<sup>th</sup> of June, 2016** in Durres, Republic of Albania the ninth international scientific and applicative conference under the topic **THE TEACHER OF THE FUTURE** will be held.

The main intention of the conference is to emphasise the role, significance, importance, and power of the teacher, as a centre of the educational processes and the transfer of the knowledge. Therefore, the following topics will be discussed at the conference: the position, function and the importance of the teacher at all educational levels (Universities, high schools and elementary schools). This comes as a result of the fact that the continuous educational process which helps in the process of practical use of the knowledge, related to all the stakeholders which have a role in its creation, use and transfer, was never before considered as an important engine of the social development. The technological changes and their impact have brought competitiveness which is imperatively transformed in a specific educational competence and sharing of the educational values. The knowledge, nowadays, as a value which erodes everywhere, imposes not only transfer, but also sharing, measurement and international coordination.

**PURPOSE:** The main purpose of the conference is to gather at one place the relevant people from the academic community who work in the field of creation, codification and transfer of the explicit knowledge, but also the tacit, intuitive, skills-based knowledge.

The specific purposes of the conference are to share knowledge and through the process of discussion to articulate all the values from the use of the knowledge in the educational process. The emphasis of the role of the teacher and its role in the process of learning is one of the focuses of the conference.

**THE THEMES FOR THE CONFERENCE INCLUDE ALL FIELDS OF STUDY RELATED WITH KNOWLEDGE** - Education, Management, Methodology of Social Sciences, Finance, Economy, Politics, Law, Criminalistics, Security, Administration, Medical science, Veterinary medicine, Dentistry, Pharmacy, Public health care, Biotechnical sciences, Communications, Informatics and information technology, Electro-technical science, Transport and logistics, Technology, Ecology, Sociology, Psychology, Social policy, Tourism, Culture, Linguistics, Literature, Geography, Anthropology, Philosophy, Architecture, Music, Art, American Studies, European studies and other scientific areas.
